## ARS

### STANDAARD ROLGORDIJN

| TYPE       | ARS     |
|------------|---------|
| ACCESSOIRE | Manueel |

#### I. TOEPASSING

|         |                                                                                                                                                                                             |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Montage | FAKRO binnentoebehoren passen op alle FAKRO dakraamtypes, met uitzondering van de dakraamtypes FTT U5 en FPT U5, die bredere vleugelprofielen hebben en daardoor kleinere binnentoebehoren. |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### II. EIGENSCHAPPEN

- traploze aanpassing van de intensiteit van het invallende licht;
- een brede waaier van kleuren om aan de individuele eisen van de klant te voldoen;
- gedeeltelijke bescherming tegen hitte. Voor een goede bescherming tegen overmatige warmte is het aan te bevelen een buitenzonwering te installeren;
- mogelijkheid om de jaloezie in drie verschillende standen open te houden;
- volledige privacy van de kamer, zodra de jaloezie is opgetrokken.
- aluminium bekleding maakt het rolgordijn onzichtbaar.
- haak - mogelijkheid om de jaloezieën in drie verschillende standen open te houden

| TYPE       | ARS     |
|------------|---------|
| ACCESSOIRE | Manueel |

#### III. ADDITIONELE ACCESSOIRES

|                   |                                                                                                                                                            |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Manuele bediening | - Het ARS standaard rolgordijn wordt met de hand bediend;<br>- De ZST telescoopstang vergemakkelijkt het hanteren van een op hoogte geïnstalleerd gordijn. |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### IV. OPTIES

|         |                                                                                                                                 |
|---------|---------------------------------------------------------------------------------------------------------------------------------|
| Stoffen | - monochromatisch transparante stof<br>- patronen op transparante stof<br>- binnenlaag van polyester en verduisteringspolyester |
|---------|---------------------------------------------------------------------------------------------------------------------------------|
